

LOCOMOTIVES

2-6-0 MOGUL

A branch line work horse, the Mogul is typical of the many locomotives that Baldwin built in the late 1800's and early 1900's.

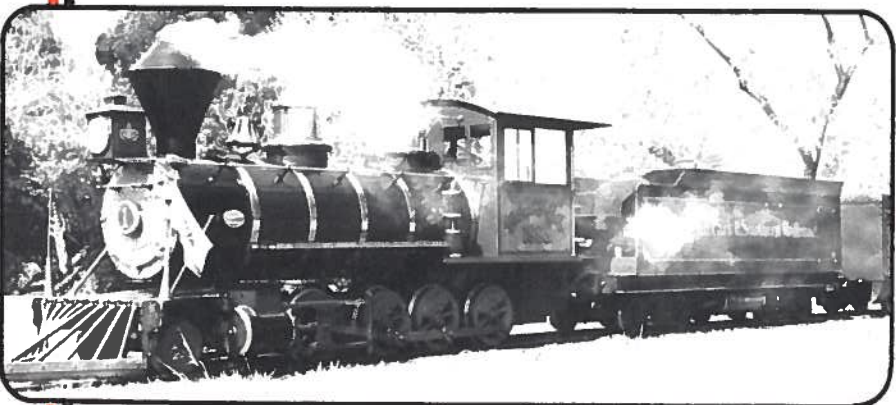

GP-40 SERIES DIESEL

Powered by an 8 hp cast iron engine, these "Geeps" are able to haul many passengers as well as serve as the power for track maintenance crews.

USRA 2-8-2 MIKADO under Power

With a trainload of over 5000 pounds this Mikado sounds like the real "McCoy" as it climbs the 2% grades at Goleta Valley & Western.

4" Scale PARK EQUIPMENT

Our park railroad at Griffith Park uses gasoline engine, hydraulic powered locomotives that are equipped to sound like steam.
